Highlights

Version: 02/2023

Slim shape for ideal space management at the charging site

With only 350 mm of depth the Vestel EVC 06 can be placed also in very narrow spaces, even directly in front of a wall. This gives the charge point operator more possibilities to install fast charging stations. The clever two part design makes the EVC 06 appear even slimmer as the dark back part disappears optically in contrast to the lighter design front.

Big and clear interface for user interaction via touch screen

User interaction is key. Therefore the Vestel EVC 06 has a big 10.4" touch screen. The resistive touch technology makes it possible to use the screen even in tough weather conditions or with gloves.

Large and easy to use foiling area for your own branding

Your brand should be in focus and visible for everyone. This is why the EVC 06 has a big and easy to use foiling area on the front. Optionally you can order the product turnkey ready in your corporate design which includes a complete foiling of the product.
